Cerebra

Difficult for user-centred designers to establish a brief with non-designers

“Wicked Problems”
(Rittel and Webber, 1973)

Obstacles

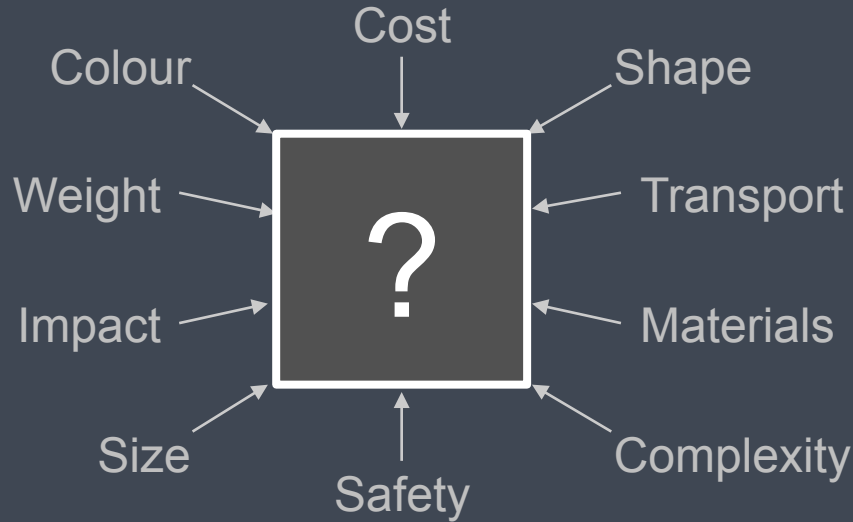

- *‘Wicked problems’*
- *Terminology*
- *Experience*
- *Rapport*
- *Emotion*

“Two separate worlds”
(Meijers, 2000)

DESIGNER'S END GOAL

To identify the attributes of the **solution**

Variety | Relevancy | Specificity

Provide designers with a toolkit that facilitates **effective communication**

Existing Methods

Inform designers of techniques
they can use to gather information

Alternative Method

Inform designers of potential
information to **inspire curiosity**

Existing Methods

Inform designers of techniques
they can use to gather information

Alternative Method

Inform designers of potential
information to **inspire curiosity**

Cycle of effective information gathering (Dewey, 1910)

Design Factors

Considerations that must be met when a system or structure is designed

'Design Factor Prompts'

Triggers that encourage the designer to consider particular design factors

Intellect	Post Code: _____ Charity Member: <i>Y / N</i>	Interaction	
Behaviour	Child Name: _____	Appeal	
Strength	Date of Birth: _____ Gender: <i>M / F</i>	Maintenance	<input type="checkbox"/> Build <input type="checkbox"/> Advice <input type="checkbox"/> Await response <input type="checkbox"/> Call back <input type="checkbox"/> Email back <input type="checkbox"/> No further action <input type="checkbox"/> Logged?
Coordination	Medical Condition(s): _____	Setting	
Incontinence	PROBLEM what is the problem?	Storage	
	what is the cause of the problem?		

During development, each iteration of the toolkit resulted in a significant improvement to the variety of information recorded versus the original methods used

USER FACTORS

Designer: *[Signature]* Date: *1/1*

Career Name:

Sex:

Email:

Address:

Post Code:

Charity Member: *Y / N*

Child Name: *Ally Bligh*

Date of Birth:

Gender: *M / F*

Medical Conditions: *C.P., Aids, D.D.*

(Aids, C.P., D.D.)

PROBLEM

Child can walk but always looking at legs sitting - self.

Needs some sort of support for the legs to sit.

Doesn't want to sit on floor.

Can't hold the girl properly when sitting down.

Needs to be held.

Age 15-20

PRODUCT FACTORS

Product Design Specification

*Some sort of chair to help child sit
well, needs to be stable.
Needs support.*

*Need to be changed into it
would be able to enter the chair.*

*wants the child to sit by the table
High Back ...*

Specifics:

- Needs to be*
- Needs support.*
- Child has to be big*
- Denim! Cotton/leather*
- Denim! Cotton/leather*
